DA-1 Assessment

Subject: Application Development and Deployment Architecture

Experiment: Jenkins and GitHub

Question:

Demonstrate Continuous Integration using GitHub and Jenkins by developing and executing a Java program individually.

Tasks to be Performed:

1. **Create a simple Java program that displays:**
   - **Student Name**
   - **Register Number**
   - **Message: *"Jenkins–GitHub Integration Successful"***

Welcome | StudentInfo.java

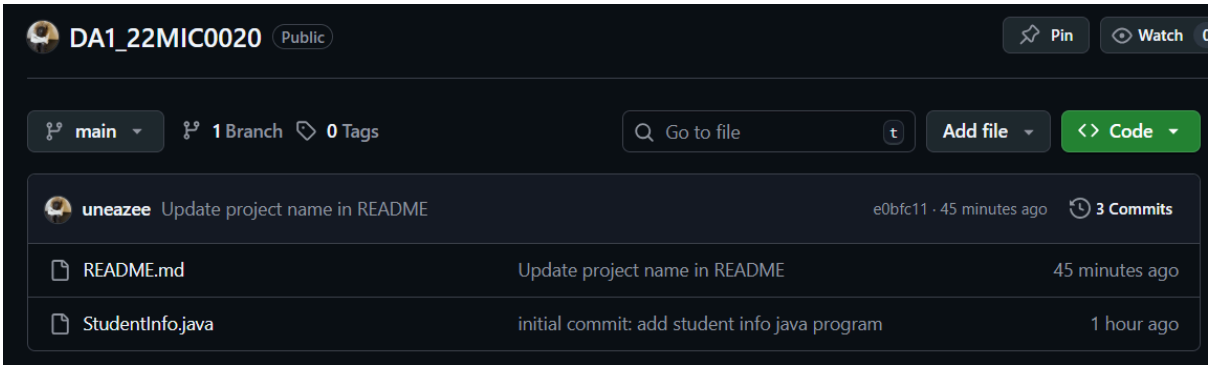
StudentInfo.java

```java
public class StudentInfo {
    public static void main(String[] args) {
        String studentName = "Anisha Singh";
        String registerNumber = "22MIC0020";
        String message = "DA 1: Jenkins-GitHub Integration Successful !!";

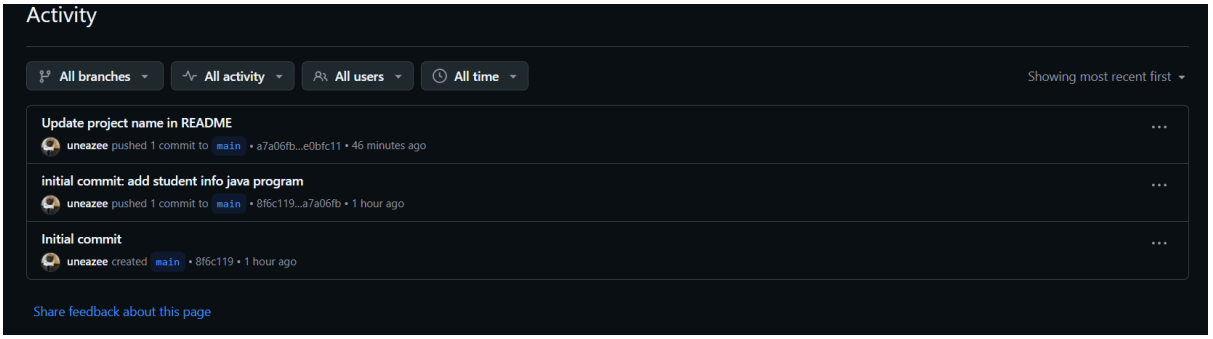
        System.out.println("Student Name: " + studentName);
        System.out.println("Register Number: " + registerNumber);
        System.out.println("Message: " + message);
    }
}
```

2. **Create a separate GitHub repository with the name:**
3. **DA1_<22MIC0020>**

GITHUB LINK: https://github.com/uneazee/DA1_22MIC0020.git



4. **Upload the Java program to your GitHub repository and make at least two commits.**



Getting Started

Unlock Jenkins

To ensure Jenkins is securely set up by the administrator, a password has been written to the log (not sure where to find it?) and this file on the server:

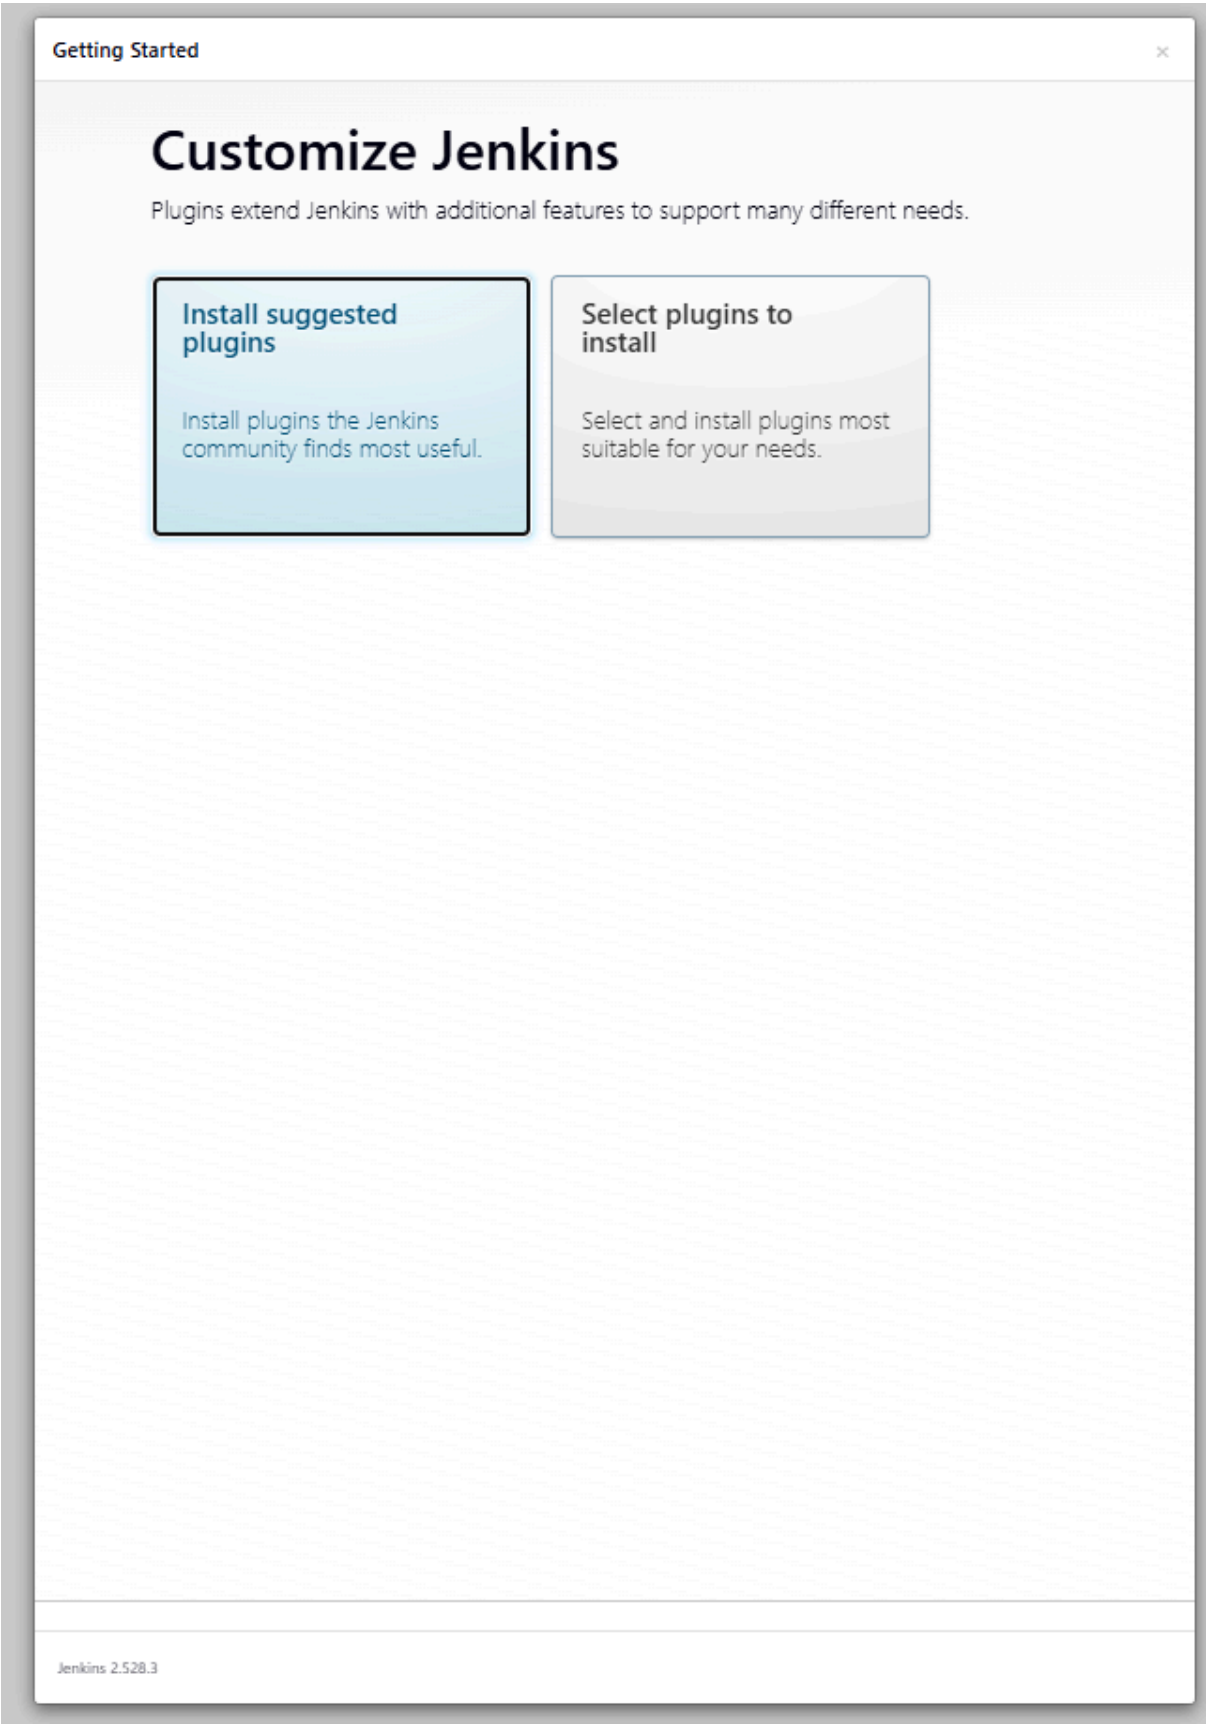
`C:\ProgramData\Jenkins\.jenkins\secrets\initialAdminPassword`

Please copy the password from either location and paste it below.

Administrator password

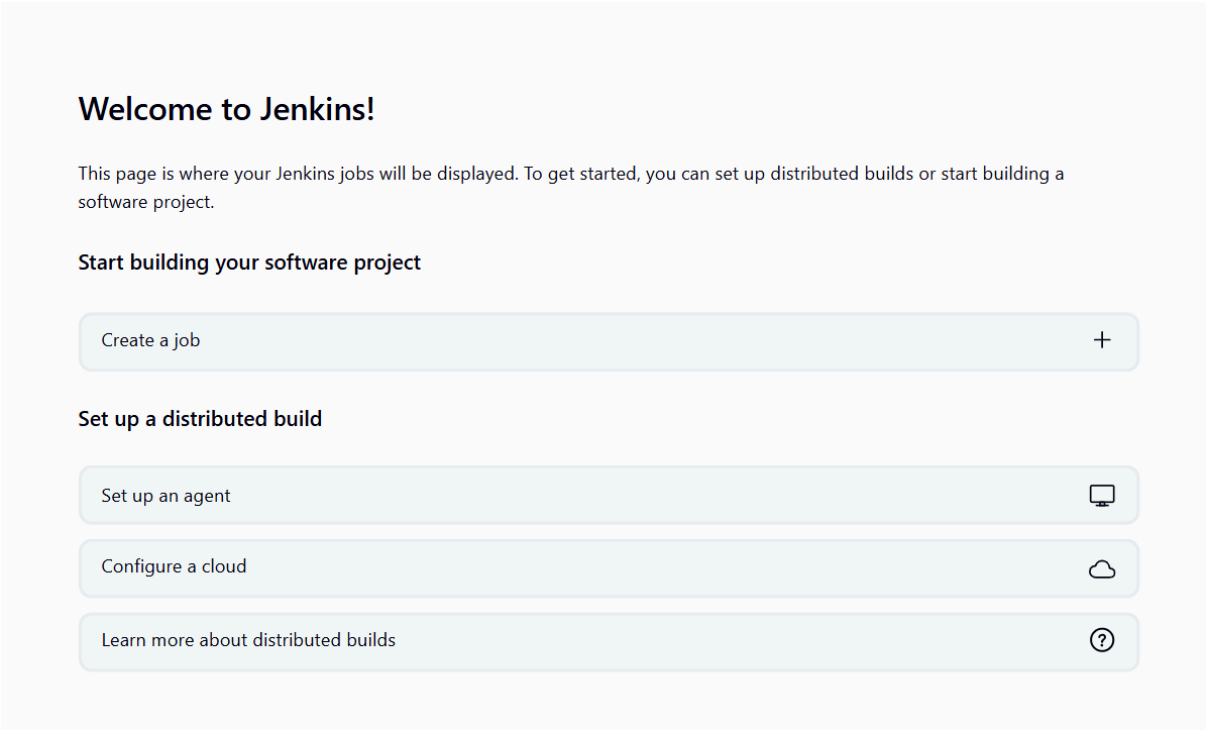
••••••••••••••••••••••••••••••••••

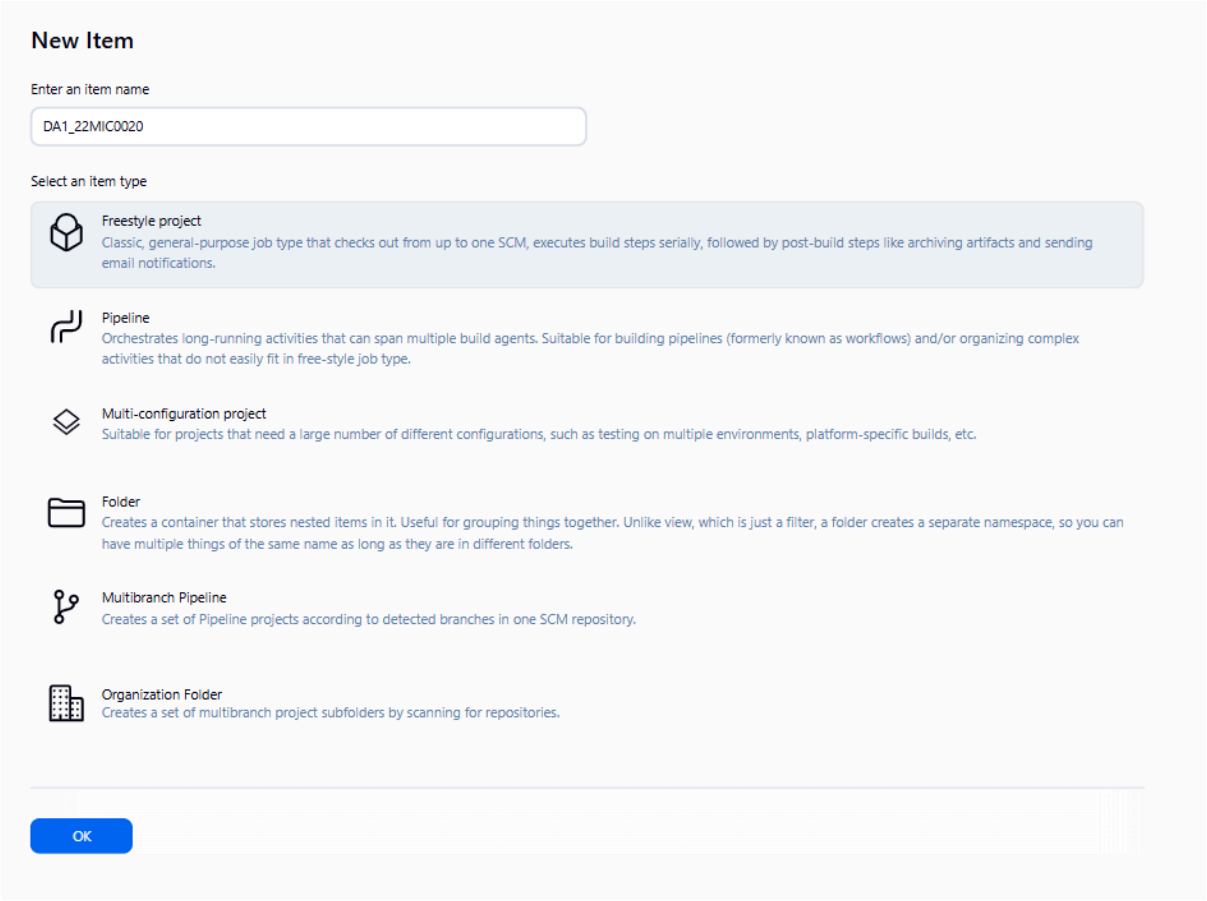
Continue



5. Configure a Jenkins Freestyle Project with the job name:

6. DA1_<22MIC0020>





7. Connect Jenkins to your own GitHub repository and execute the build.

- [ ] Discard old builds ?
- [x] GitHub project
  - Project url ?
    - https://github.com/uneazee/DA1_22MIC0020.git
  - Advanced
- [ ] This project is parameterized ?
- [ ] Throttle builds ?
- [ ] Execute concurrent builds if necessary ?

Advanced

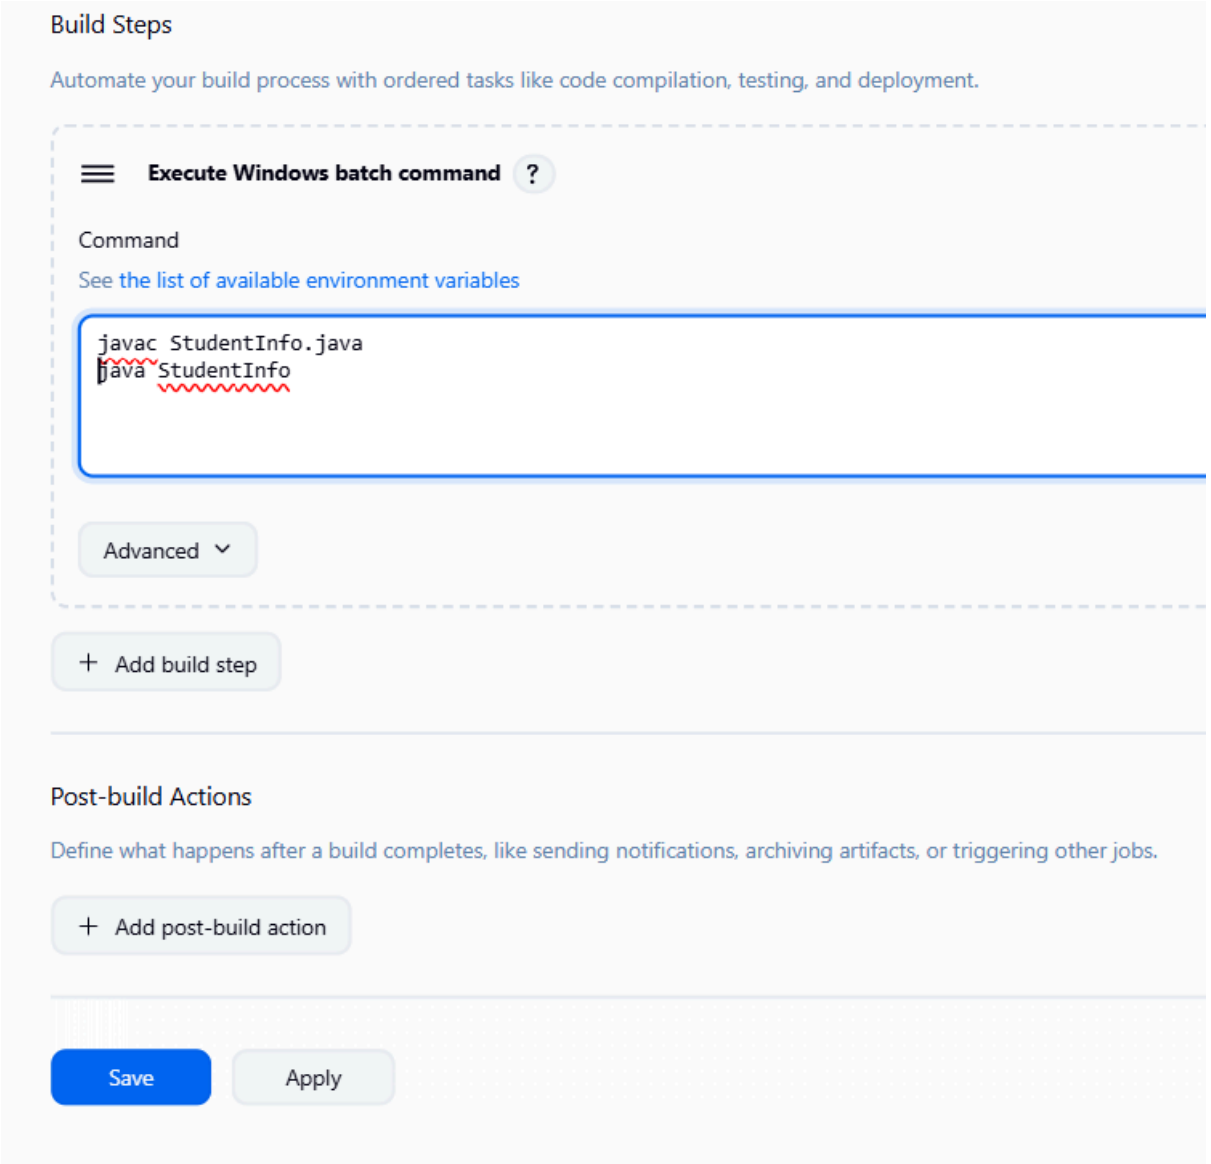
Build Steps

Automate your build process with ordered tasks like

+ Add build step

Filter

- Execute Windows batch command
- Execute shell
- Invoke Ant
- Invoke Gradle script
- Invoke top-level Maven targets
- Run with timeout
- Set build status to "pending" on GitHub commit



8. Ensure the Jenkins Console Output displays your Name and Register Number.

#1 (Jan 11, 2026, 11:23:01 PM)

Started by user anisha singh

This run spent:

- 91 ms waiting;
- 9.5 sec build duration;
- 9.6 sec total from scheduled to completion.
