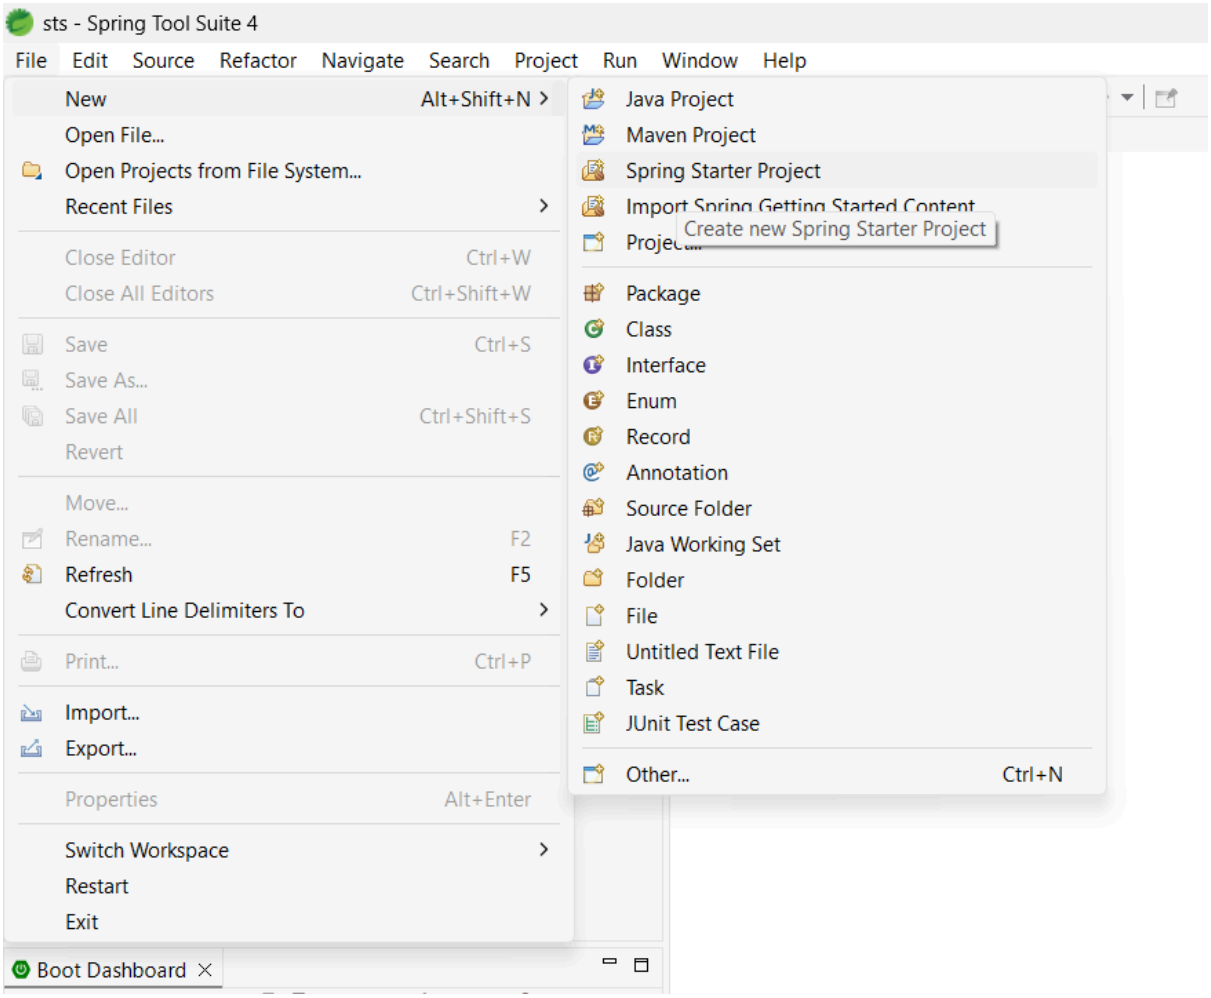
STS

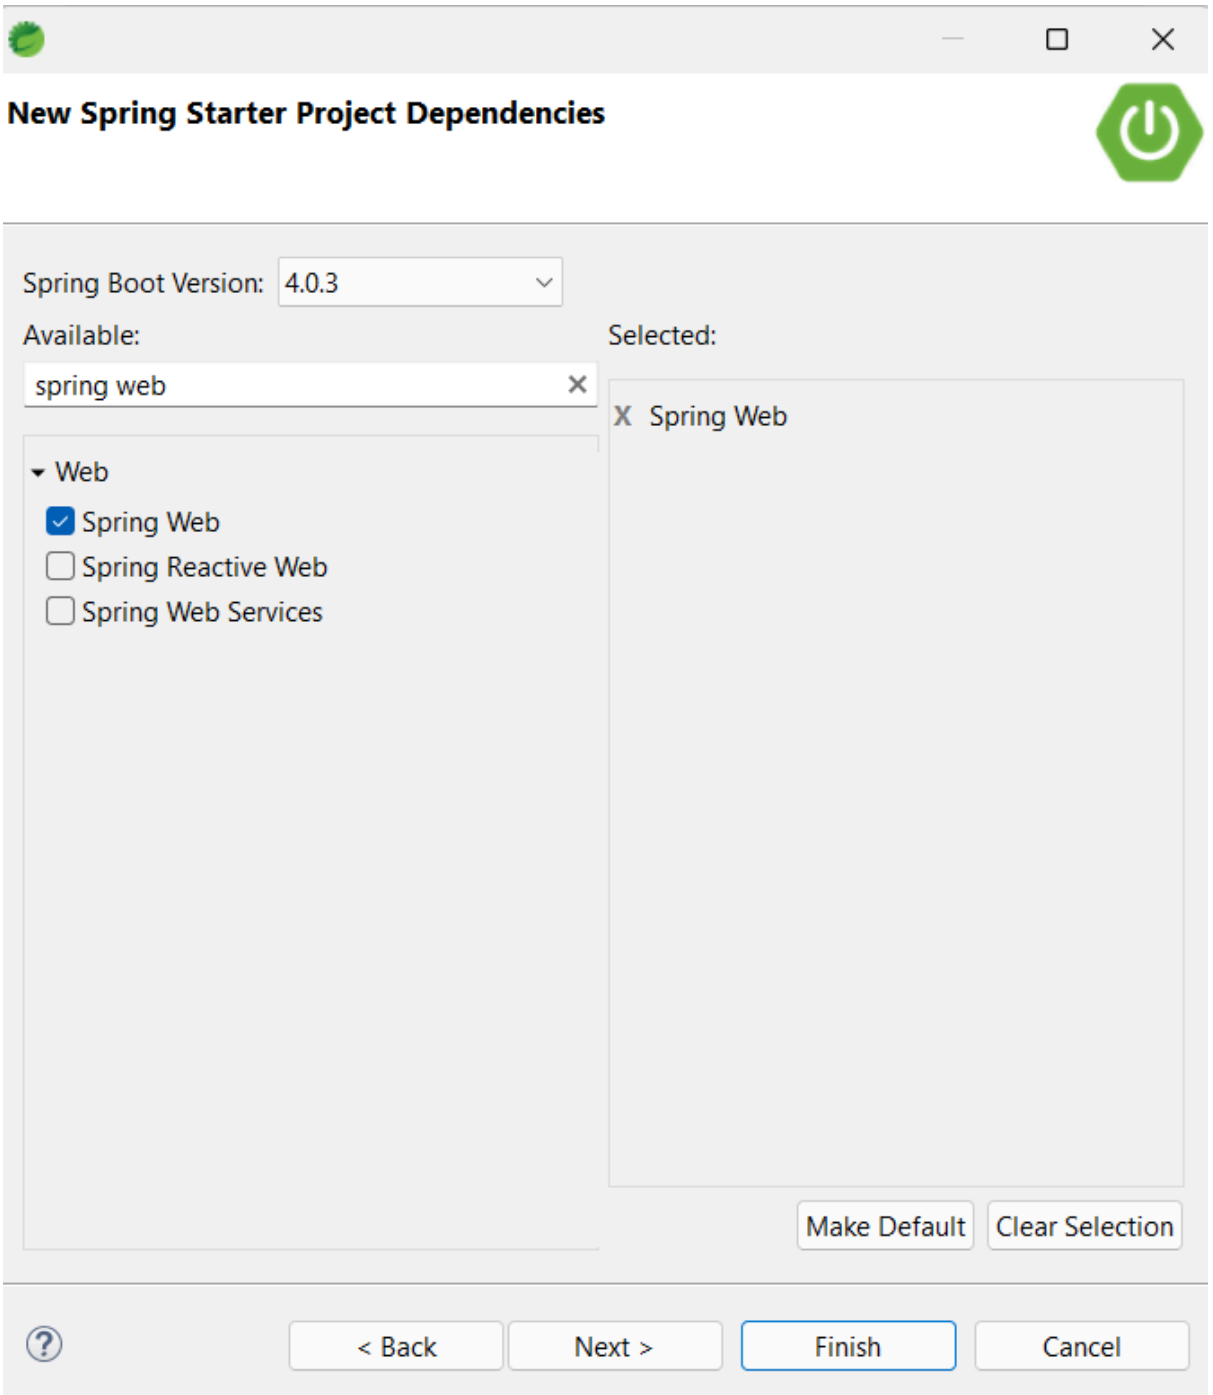
Go to **File** → **New** → **Spring Starter Project**



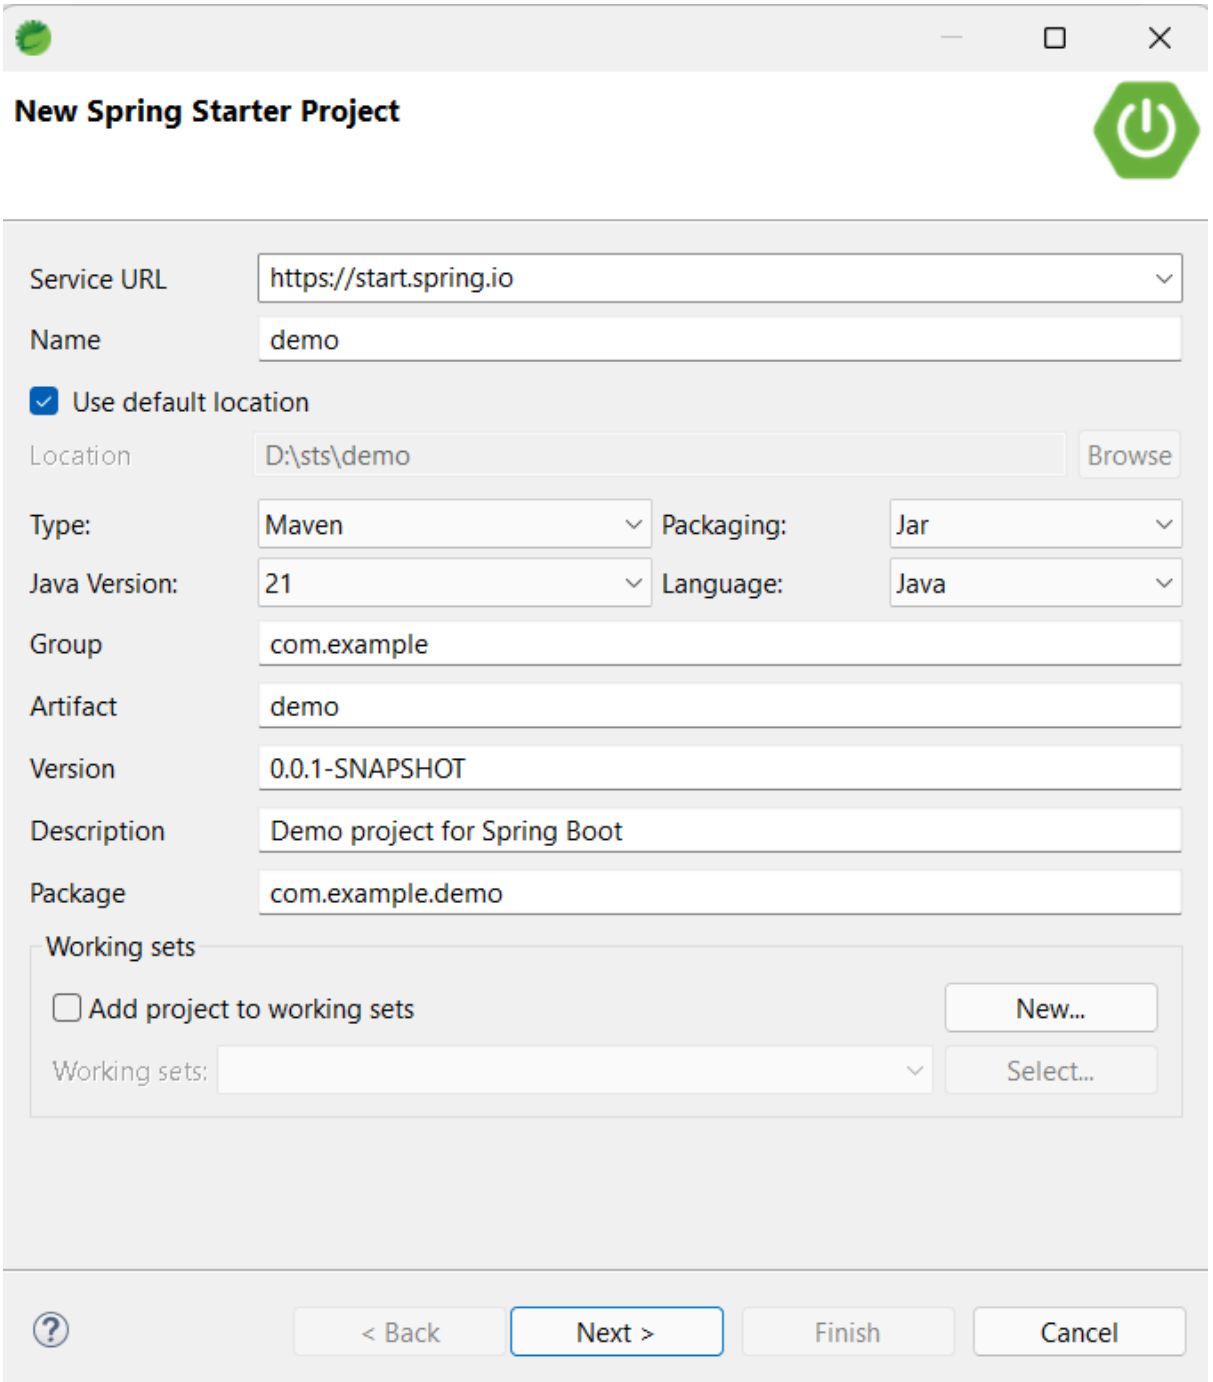
Fill in:

- Name: `demo`
- Type: Maven
- Java version: 21 (or whatever you have)
- Packaging: Jar

Click **Next**, add dependency: **Spring Web**

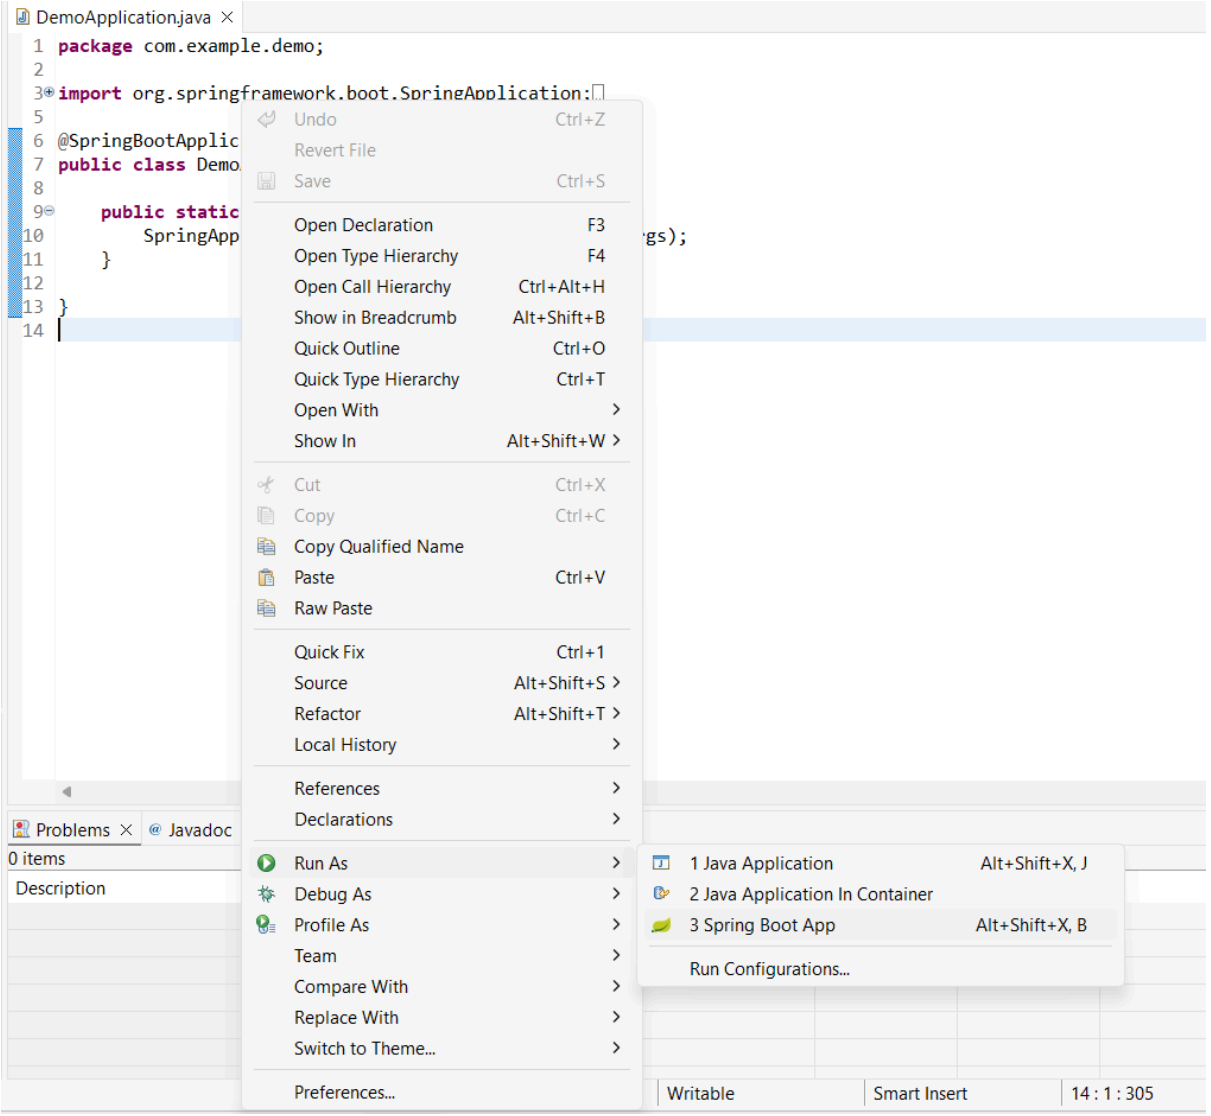


Click **Finish**. STS will download dependencies automatically

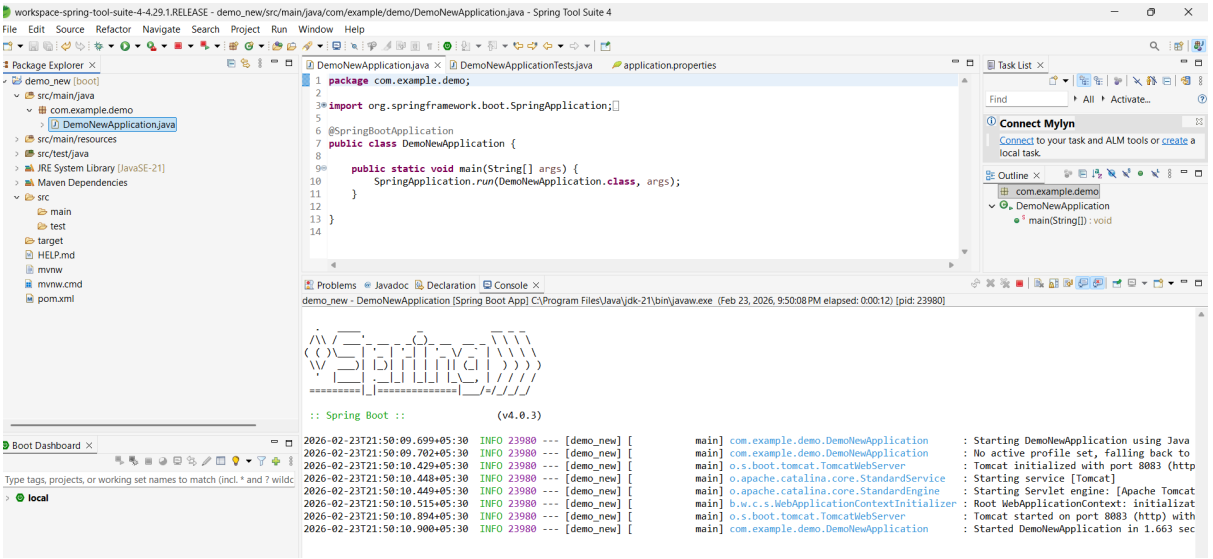


In the Project Explorer, right-click your project

Run As → Spring Boot App

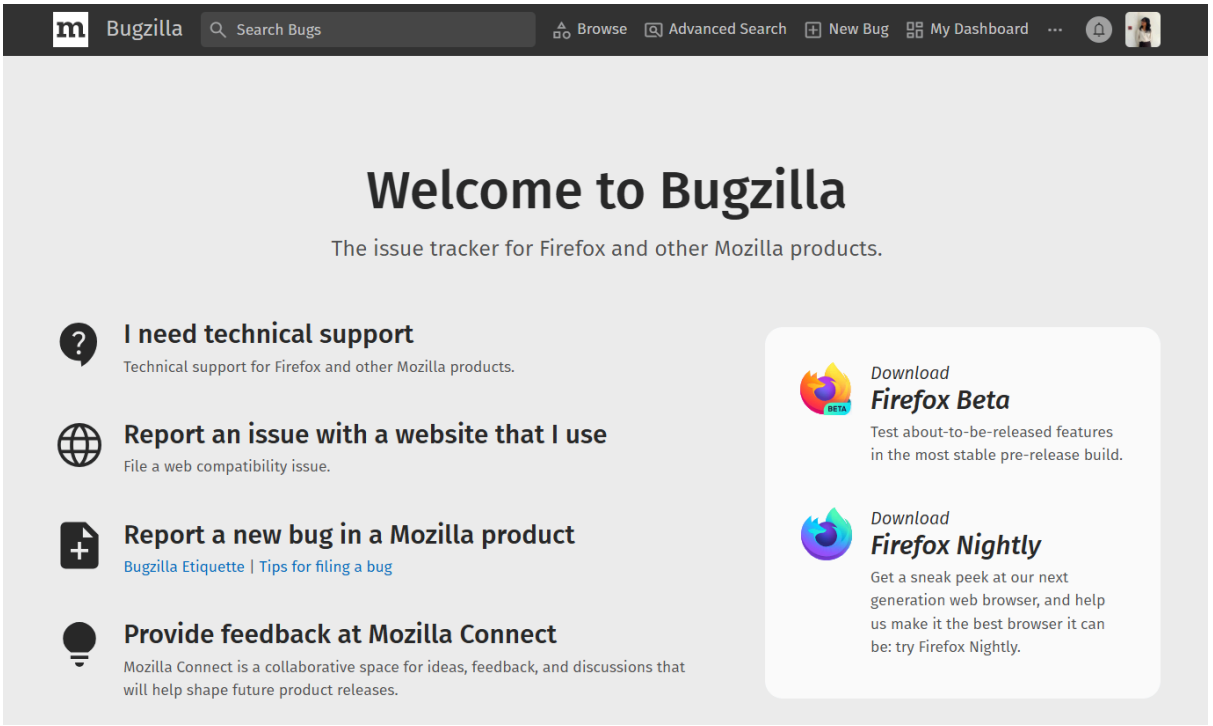


The console at the bottom will show output ending with something like:

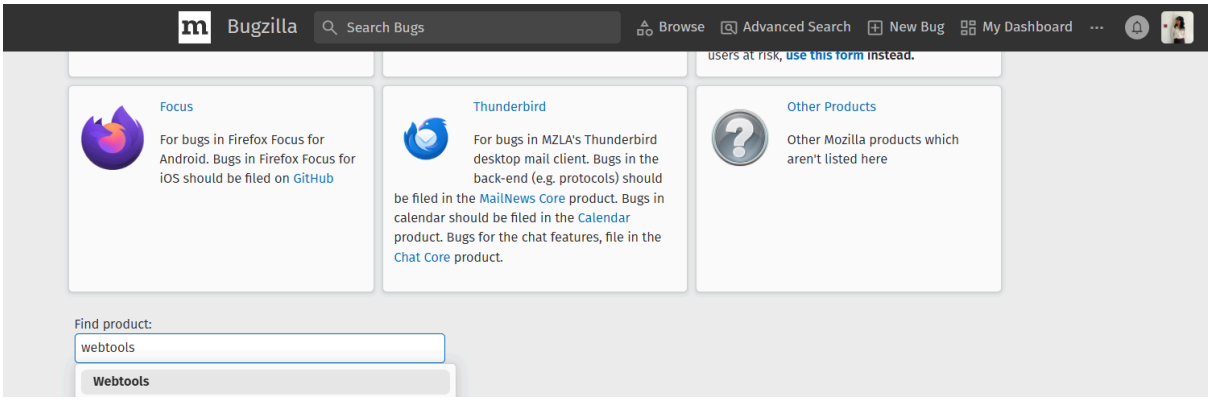


BUGZILLA

Go to https://bugzilla.mozilla.org
Click **Create Account**, enter your email and set a password
Confirm your email, then log in, you'll see the dashboard



Click **File a Bug**
For Product, search and select **WebTools** or any available web product



Fill in:

Summary: Home page not loading properly

Enter A Bug

- Please fill out this form clearly, precisely and in as much detail as you can manage.
- Please report only a single problem at a time.
- These guidelines explain how to write effective bug reports.

Summary: Home page not loading properly

Product: Webtools (Change) **Version:**

Component: (List) General

Requests for the Webtools team that don't fit elsewhere

Description: Application home page is not displaying expected output
Steps to Reproduce: Open browser → Enter localhost:8080 → Page shows incorrect output
Expected Result: Page should show correct message
Actual Result: Incorrect output shown

What did you do? (steps to reproduce) Markdown supported

1. Open browser
2. Enter localhost:8083 in address bar
3. Page loads with incorrect output

What happened? (actual results)

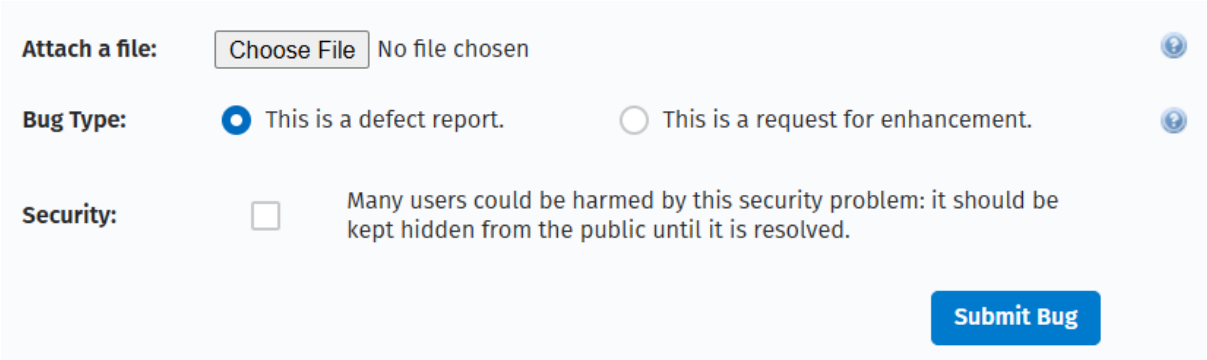
Application home page is not displaying expected output

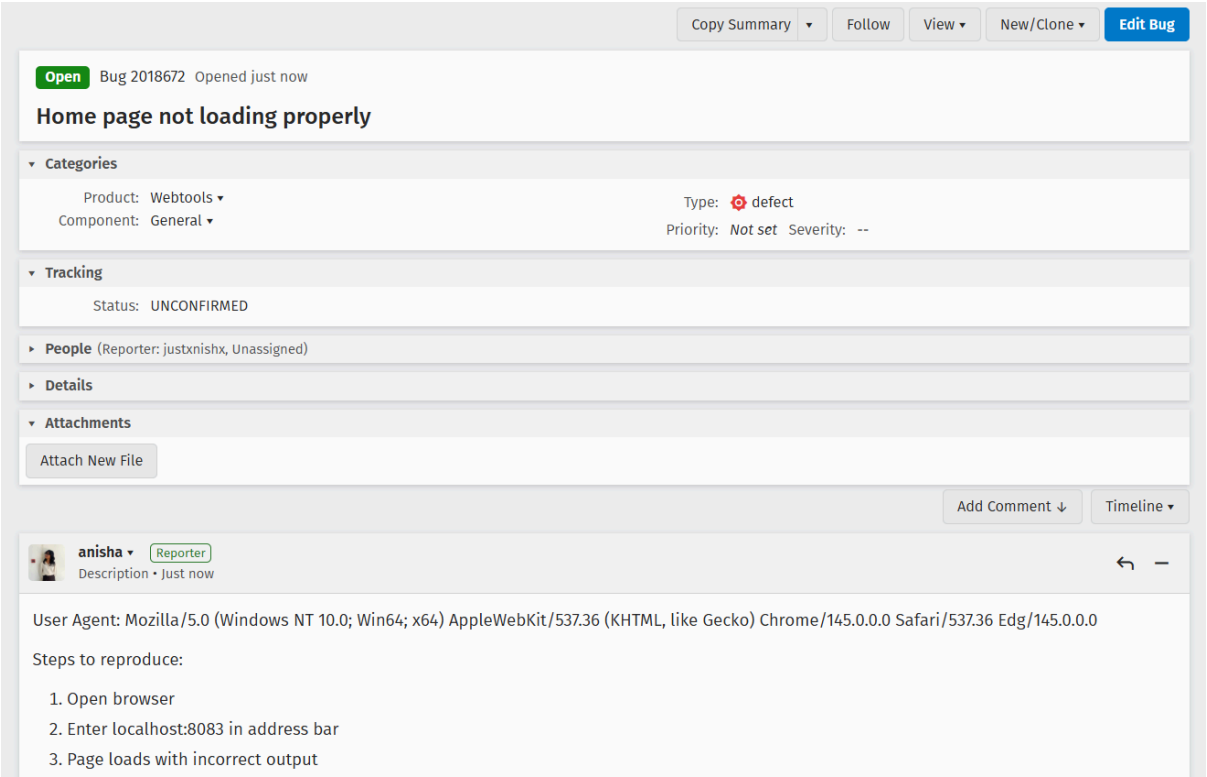
What should have happened? (expected results)

Page should display the correct welcome message

☑ Include your browser's user agent string in the bug description. This can be helpful to developers working on your issue.

Select a Severity (e.g. Normal)
Click Submit Bug





Bug ID Generated
Bugzilla will assign a Bug ID automatically (e.g. Bug #101) and you'll see the confirmation page.
